

Environ Wins Top Beauty UK Magazine Award

The efficacy of Environ skincare products has once again been recognised. Ireland's prestigious monthly woman's magazine Image announces the winners of its 2012 Beauty Awards. Environ, the brand founded by South African plastic surgeon D Dr Fernandes, has won the awards for Best Toner with the AVST Moisturising Toner. This was after weeks of intensive, unbiased testing by an independent expert panel of beauty industry professionals.

More than 500 new products were judged in various categories with each product evaluated on a list of criteria, including value for money, product performance texture, packaging and scent.

Judge Elaine Butler Doolin commented on winning products **"This toner is a brilliant at closing up pores while respecting the skins natural balance, but it goes a step further with ethoxydiglycol, an ingredient that increases efficacy of everything else you can use on top of it."**

Environ's success in 2012 follows on from two Image awards won last year for the Ionzyme Focus Frown Serum and AVST Eye Gel.
